# Cumulative Editorial Index

Including January 1981 through December 1981. Number preceding hyphen is month of issue; those following are page numbers. Asterisks indicate items appearing in departments. PRODUCTION ENGINEERING is indexed in Applied Science & Technology and the Engineering Index, available in libraries generally. Microfilm copies are available from University Microfilms, 300 N. Zeeb Rd., Ann Arbor, Mich. 48106. Reprints of early issues are available from Johnson Reprint Corp., 111 Fifth Ave., New York, N.Y. 10003.

## A

**Adhesives,** roundup, 2-30
*Angelo, R.G.,* DC Drives, 4-66
*Appleton, D.S.,* Four Steps To Productivity, 5-54
Assembly, adhesives, 2-30
*Austin, J.,* Troublefree Handling In Gritty Environments, 12-54
**Automotive,**
1982 models, 10-32
J-body cars, 5-16*
K-car assembly, 1-36

## B

*Battersby, M.E.,*
Are You Overlooking A Tax Bonus?, 3-50
Tax Reform—Aye or Nay?, 5-8
*Boulden, L.L.,*
1982 Cars, 10-32
Copeland: In Search of the Focused Factory, 1-48
Production Engineering's Stand on Productivity, 2-24
Salary Survey, 3-28
Tooling, 9-82

## C

**CAD/CAM,**
automatic factory, 8-30
at Bell Helicopter, 1-58
at Lockheed-Georgia, 11-44
slow progress, 11-10
**Cahill, P.,* Troublefree Handling In Corrosive Environments, 12-38
*Calhoun, T.,* Ultrasonic Cleaning Boosts Your Scour Power, 10-58
*Chan, M.,* Video Tape, 3-61
**Clutch/brake packages,** 11-60
**Controls,**
absolute encoders, 2-54
fiber optic scanners, 7-54
hierarchial, handling, 8-54
microprocessors, 8-38
numerical control overview, 3-42
reducing downtime, 4-58
smaller and better, 9-58

## D

*DeBarr, A.,* Machine-Tool Research In England, 2-38
*Dlugatch, I.,* A New Approach To Productivity, 7-30
**Drives,**
adjustable frequency ac, 4-74
clutch/brake packages, 11-60
dc adjustable speed, 4-66
gear tooth wear, 4-90
smart drives, 9-58
*Droy, J.,* Machining Centers Mean Production Profits, 6-50

## F

*Fayfield, R.W.,* Controlling With Bendable Bundles of Light, 7-54
**Fiber optics,** 7-54
**Focused factory,** 1-48
*Forgeron, E.J.,* Oil Analysis, 4-82

## G

*Goodfellow, M.,* Quality Circles, 6-28

## H

*Hegland, D.E.,*
Adhesives—Production Cost Cutters, 2-30
Bell Helicopter—Flying On The Leading Edge, 1-58
CAD-CAM Integration—Key To The Automatic Factory, 8-30
Control Failure Knowledge, 4-58
Evolution In Machines And Systems, 9-42
Flexible Manufacturing—Your Balance Between Productivity And Adaptability, 5-38
Nontraditional Processing, 10-50
Numerical Control—Your Best Investment In Productivity, 3-42
Out In Front With CAD/CAM At Lockheed-Georgia, 11-44
Quality Circles—Key To Productivity With Quality, 6-26
The Design Show, 4-34
*Holdridge, G.L.,* Break The Rules To Boost NC Profits, 7-48
*Horst, R.L.,* ABCs of Productivity Analysis And Improvement, 4-48
*Hughes, T.,*
Atari's Video Coin-ops: Games People Pay, 1-42
HWBFs: Hard Times And Hardware Put Them To Work, 6-34
Innovative Inspection Methods, 9-74
Look What They're Doing With Galvanized Steel!, 11-52
New Materials—More Than Just Light, 10-37
Precoated Metal: Big Move To Lower Production Costs, 7-38
Walk Through, Talk Through Productivity-Boosting Hardware, 10-19
**Hydraulic,**
high-water-base fluids, 6-34
oil analysis, 4-82
*Hyzer, W.G.,* Instant Film, 3-58

## I

**Inspection,**
by parts feeders, 3-66
current trends, 9-74
gear tooth wear, 4-90
in-process NC gage, 3-42
troubleshooting by camera, 3-58
troubleshooting, video tape, 3-61
*Irwin, R.D.,* Get The Most From Computerized Steel-Collar Workers, 8-46

## J

**Japan,**
imprecise responsibilities, 2-8*
manufacturing strategies, 5-15*
*Judson, B.M.,* Where Reworking Works Wonders, 6-43

## K

*Kahrs, J.,* Troublefree Handling In Corrosive Environments, 12-38
*Kehrl, H.H.,* Engineering's Role In National Policy, 8-24

*Kochanowski, J.*, Here They Come—Structural Foams, 5-46
*Koehl, W.M.*, Modern Electric Clutches Take Hold In Productivity Drive, 11-60
*Kramer, R.T.*, Productivity: An Engineering Perspective, 11-22
*Kumar, S.*, Wedding Absolute Encoders To PCs: Rights And Wrongs, 2-54

## L

*Lanesskog, J.H.*, Troublefree Handling In Hazardous Environments, 12-46
*Larsson, A.*, Continuous Thermal Press Forming Looks Hot, 2-46
*Leonard, L.*, K-Cars—Chrysler's Bid For A Future, 1-36
*Lukas, M.P.*, How Microprocessors Control Process Systems, 8-38

## M

**Machine tools,**
British research, 2-38
evolutionary progress, 9-42
**Management,**
consensus style, 10-66
modernize or buy new, 6-42
organization theory, 5-54
producibility vs. methods engineering, 10-50
seven tough problems, 7-8*
supervision effectiveness survey, 5-30
**Manufacturing,**
1982 autos, 10-32
consumer tools, 1-52
flexible systems, 5-38
J-body cars, 5-16*
video games, 1-42
**Market trends,**
computers in training, 11-21*
fluid power, 8-18*
optical communications, 3-14*
personal computers, 5-24*
power supplies, 10-15*
speech synthesis, 4-15*
**Materials,**
1982 autos, 10-37
galvanized steel, advantages, 11-52
precoated metal, 7-38
structural foams, 5-46
**Material handling,**
hierarchial controls, 8-54
in cold environments, 12-30
in corrosive environments, 12-38
in gritty environments, 12-54
in hazardous environments, 12-46
in hot environments, 12-22
show/forum preview, 2-69
*McCormack, N.*, Oil Analysis, 4-82
*McRainey, J.H.*,
Black & Decker—Organized To Offset Inflation, 1-52
Converging On A Consensus—Hierarchial Handling Control, 8-54
Gear Failure Knowledge, 4-90
Handling Systems, 9-66
Two Feeders Solve A Lot Of Problems, 3-66
You're Wrong If You Think Producibility Is A Methods Problem, 10-50
**Microprocessors,** in process systems, 8-38
*Moon, E.E.*, Troublefree Handling In Hot Environments, 12-22

## N

*Nelson, G.*, Here They Come—Structural Foams, 5-46
**Nontraditional processing,** 10-50
**Numerical control,** organization improvement, 7-48

## P

**Parts feeding,** qualifying feeders, 3-66
**Parts handling,** improving productivity, 9-66
*Pendragon, P.*, Beware The Wrath Of Abibarshim!, 7-24
**Processing,**
continuous press forming, 2-46
powder coating, 6-15*
ultrasonic cleaning, 10-58
**Producibility vs. methods engineering,** 10-50
**Production engineering,**
and design engineers, 7-24
at Atari/video games, 1-42
at Bell Helicopter, 1-58
at Black & Decker/consumer tools, 1-52
at Chrysler/K-car, 1-36
at Copeland/compressors, 1-48
CAM delphi study, 8-34
salary survey, 3-28
**Productivity,**
departmental measurement, 7-30
engineering's role, 8-24
establishing a data base, 5-54
importance of downtime, 4-58
importance of quality, 4-48
improvement programs, 3-34
improvement program, Black & Decker, 1-52
motivation programs, 6-8*
robot's role, 12-
production engineering role, 2-24
quality circles/Gould, 6-26
supervision effectiveness survey, 5-30
**Programmable controllers,**
benefits, 1-18*
in modernizing machines, 9-58
technology update, 11-34

## Q

**Quality,** public perception, 1-8*
**Quality circles,** supervisor training, 6-28

## R

**Robots,** 8-46
*Rodgers, R.C.*,
Entrepreneurial Spirit Sharpens Competitive Edge, 10-66
Supersmart Controls, 10-58
What's News In PCs, 11-34
*Roman, A.W.*, How To Tune In On Company Goals And Objectives, 5-30
*Rozner, J.D.*, AC Drives, 4-74

## S

*Scheib, T.J.*, How Microprocessors Control Process Systems, 8-38
**Strategies,**
manufacturing, 1-10*
people motivation, 10-66
productivity organization, 5-54
*Sytsma, B.*, Troublefree Handling In Cold Environments, 12-30

## T

**Taxes,** rehabilitation credit, 3-50
**Technology trends,**
CAM delphi study, 8-34
computer terminals, 3-78
distributed data processing, 7-60
electronic counters, 5-71
fastening techniques, 8-63
liquid level measurement, 2-61
noncontact sensing, 5-63
software, 2-64
stainless steels, 3-75
static elimination, 7-62
temperature measurement, 6-59
test gages, portable, 5-66
toolchangers, 10-75
**Tooling developments,** 9-82

## U

**Ultrasonic cleaning,** 10-58

## W

*Weisel, W.K.*, The Robot's Role In Productivity, 12-18
**Workers,**
flexible work schedules, 11-8*
machining center operators, 6-50
team production, 10-10*
tradeoff income for time, 2-10*

## Y

*Young, S.L.*, What's Needed for Productivity Improvement, 3-34
